

Name: _____ Class: _____

Phrase Searching & Truncation

Practice creating search phrases to get relevant results when searching for information online. There is more than one good answer!

1. Max needs information about how global warming is impacting polar bears. **Write** the *best* search phrase for Max.

2. Sarah wants to find out more about healthy snacks that are delicious for kids. **Think** of two good search phrases she might use.

3. Raj wants to know how contact sports have become safer over time. His keywords (contact sports, helmets, injury, history) have been giving him irrelevant results. **Show** how he could use additional or different keywords, phrase searching (quotation marks), and/or truncation for better results.
